

Watson Road Veterinary Clinic

Surgery Release Form

Canine & Feline

Date: _____ Client Name: _____

Patient Name: _____ Weight: _____

Phone number: _____ Alternate phone number: _____

Breed _____ Sex: _____ Age: _____ Color: _____

Watson Road Veterinary Clinic will use all reasonable precautions to minimize anesthetic and surgery risks and complications. I understand that some degree of inherent risk is present with the use of drugs, anesthesia or surgery. I also understand that problems that can arise are usually due to pre-existing conditions that may not be evident from a physical examination and/or blood work.

Please initial next to the procedure or service you would like performed on your pet.

WRVC Staff

_____ Procedure: _____

Blood Work Options: Please initial the option you would like performed. Blood work will be completed before your procedure. A staff member will contact you prior to beginning if significant abnormalities are found.

_____ Pre-Anesthetic (\$57.00) _____ Adult Screen (\$185.00) _____ Senior Screen (\$225.00)

_____ Heartworm Test (\$46.00) _____ Thyroid Level: T4 (\$57.00) _____ FELV/FIV Test (\$62.00)

_____ AVID® FriendChip™ (\$46.00) _____

_____ Deciduous Extractions (\$5.00) _____

_____ IV Catheter and Fluids (\$61.00) _____

_____ Vaccinations (Cost Varies) _____

_____ Preventative Medication (Cost Varies) _____

_____ Histopathology (\$160.00) _____

Pain medications and/or antibiotics may be sent home for your pet depending on procedure (Cost varies)

By signing below, I authorize Watson Road Veterinary Clinic to perform anesthesia, surgery and the above initialized services.

Surgery Release Form

Canine/Feline

Terminology Explanation

Blood Work: Blood work done before an anesthetic procedure can provide a baseline for your pet's health and can alert the veterinarian to abnormal levels and concerns. We offer a variety of options to evaluate your pet prior to any anesthetic procedure.

Pre-Anesthetic: This panel assesses your pet's liver levels (ALT & ALP), kidney levels (BUN & Creat), blood sugar level (blood glucose) and total protein level.

Adult Screen: This panel includes all the values included in the Pre-Anesthetic panel plus Electrolytes, Proteins and additional Liver and Kidney Enzymes. Additionally a Complete Blood Count (CBC) is included which gives information on hydration status and anemia (Red Blood Cells), infection (White Blood Cells) and clotting ability (Platelets).

Senior Screen: This is our most comprehensive blood panel done in our in-house laboratory. This panel includes a Complete Blood Count (CBC), full Chemistry panel with SDMA (early indicator of kidney disease) and a Thyroid level.

Heartworm Test: This test requires a few drops of blood to determine whether your pet has heartworm disease. We recommend yearly testing and staying on Heartworm preventative year round.

Thyroid Level: This test checks your pet's thyroid level by determining the T4 level. Too low may require lifelong medication to raise the levels to normal. Too high may require lifelong medication to suppress the levels to normal.

FELV/FIV Test: This blood test will determine whether your pet has Feline Leukemia Virus and/or Feline Immunodeficiency Virus. Knowing if your pet is positive to one or both of these viruses is instrumental in managing your pet's future health.

Pain Medication: Take-home pain medication will ensure your pet stays comfortable during recovery at home. Typically pain medication will be prescribed to 2-7 days. If you feel your pet is experiencing additional pain or discomfort please call to discuss concerns.

IV Catheter and Fluids: The IV Catheter allows immediate access for the administration of fluids and medication. The fluids help maintain your pet's blood pressure during surgery and supplies hydration needed to keep your pet healthy and enable them to process the anesthesia.

AVID® FriendChip™: The AVID® FriendChip™ is a tiny microchip that contains a unique identification number. The FriendChip™ is injected under the skin like a vaccination. You will be sent home with the unique identification number and information on how to register your number.

Nail Trims (Complimentary): Performed while your pet is under anesthesia.
